

Socomec shines at the 2nd Hacking Industry Camp

Benfeld, 17 October 2016

The 2nd Hacking Industry Camp was held on 14-16 October at the INSA Institute in Strasbourg. 3 projects presented by Socomec staff received awards.

147 employees from Socomec, ES (Strasbourg electricity utility company) and Hager participated in the 2nd Hacking Industry Camp that took place on Friday 14 October lasting through to Sunday 16 October at the INSA Institute in Strasbourg. A whole weekend of innovative action with two sleepless nights during which competitors worked hard to submit 17 digital projects that were supposed to offer concrete and innovative solutions for the everyday management of companies.

The 147 participants of this 2nd innovation marathon were divided into 17 multidisciplinary teams comprising technicians, software developers, coders, graphic designers and sales reps who were coached by start-up employees specialised in coding, web design and Cloud hosting.

They had 54 hours non-stop to present their project. Of the 17 projects selected for the competition, 3 had been submitted by Socomec and they received 5 awards during the closing ceremony. The 3 projects were: an app for viewing, understanding and predicting technical data via logs, a discussion platform to foster link-up between inventors and technicians, and a connected object to ensure the safety of isolated or remote personnel.

We'll certainly be returning for the 3rd Hacking Industry Camp in 2017. In so doing, Socomec will be demonstrating its collective involvement in the development of new digital solutions.

ABOUT SOCOMECE
